

“We commissioned a trial of competing IP Video vendors led by an independent consultant. IndigoVision was chosen because of its superior compression technology, excellent video quality and the ease of use of their video management software for both the operators and supervisors.”

Steve Dupoizat
Casino Director of Security

Casino Théâtre Barrière de Toulouse, France

One of France's newest Casino and Entertainment centers in Toulouse has deployed IndigoVision's IP Video solution for its demanding security surveillance requirements. The Casino Théâtre Barrière de Toulouse is an exciting 14,000m² venue, which includes a 1,200 seat theatre, 3 restaurants, 3 bars, 14 gaming tables and 250 slot machines.

“We are pleased to have chosen IndigoVision for the first IP-based surveillance solution in a French casino in 2007,” said Steve Dupoizat, the Casino's Director of Security. “The operation of the system has been very impressive.”

Steve Dupoizat realized early on that a distributed IP Video solution was fundamental to provide the casino complex with a reliable, fault-tolerant and scalable surveillance solution.

SPIE Sud-Ouest, IndigoVision's approved partner, installed the 350 camera system, which is controlled using 'Control Center', IndigoVision's Security Management Software (SMS). The software allows operators to view live and recorded video, manage alarms and to quickly search and analyze recorded video for an incident.

“Having quick access to recorded video allows operators to deal efficiently with incidents and disputes,” added Mr Dupoizat. “Responsiveness is fundamental to the Casino as we need to respond rapidly to ensure smooth operation of the games.”
